## GENDER DERBY - SCREENING FORMATS

Gender Derby can be screened in several configurations.

### **Principle :**

To ensure visual comfort, depending on the opening and depth of the room, we project 1 to 3 screens vertically on the screen surface. Depending on the projection room, we adapt the number of vertical screens projected.

### **Objective :**

By taking into account the specificities of the projection room, we propose an adapted, custom-made projection format.

### **Recommendations :**

Small room (less than 300): 1 central screen.

Medium room (300): 1 central screen.

Medium room (300): large opening. 2 screens.

Large room (+ 300): 2 screens.

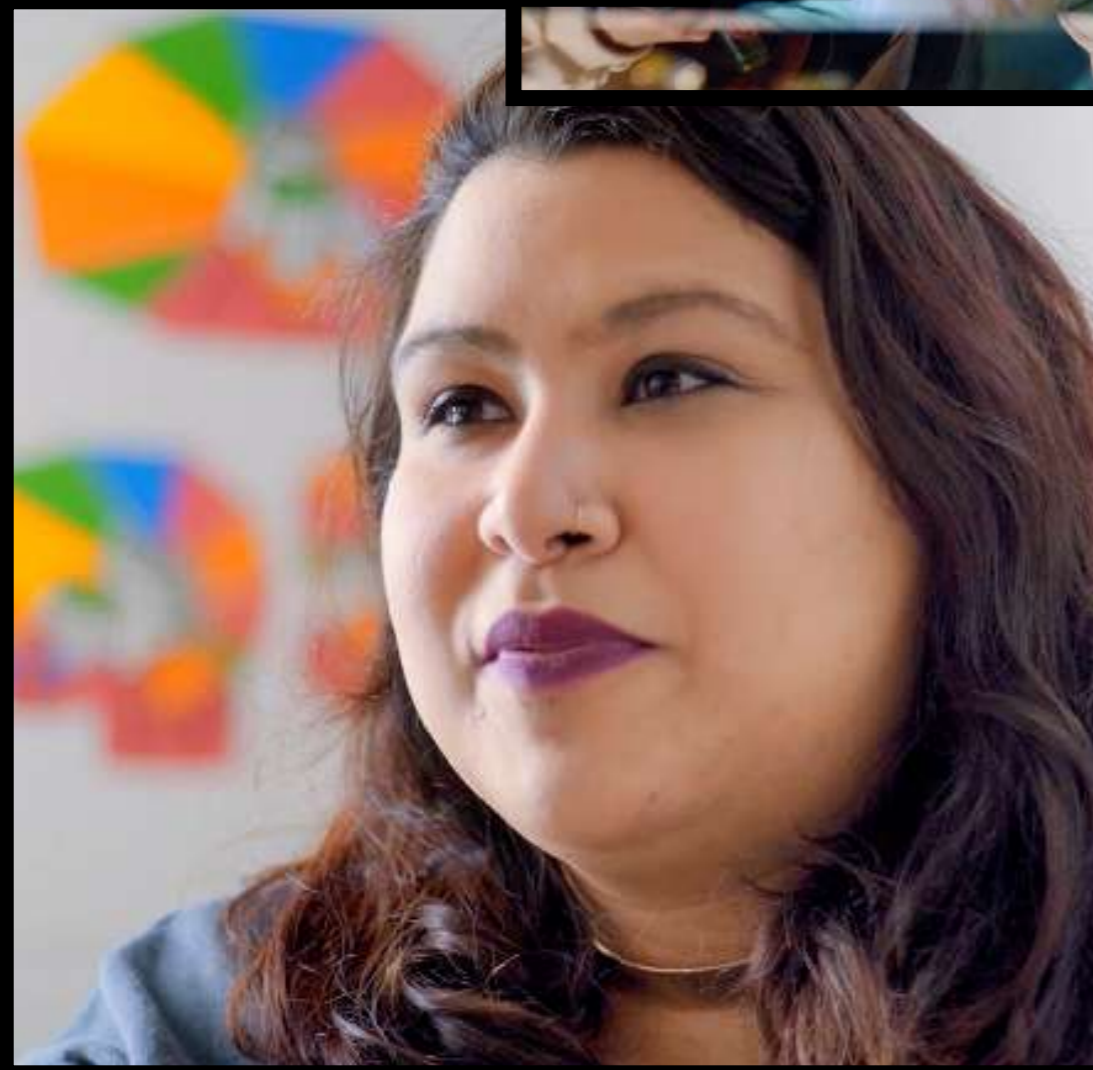

Large room (+ 300): large opening, small depth. 3 screens.
